## Career Profile

Second year Bachelor of Information Technology student majoring in Applications Development. I possess high quality interpersonal and communication skills capable of managing clients, staff, and stakeholders within a dynamic environment. I have a rich employment history in customer service and community safety, overcoming challenges by collaborating and applying critical thinking to manage complex situations. I'm passionate and enthusiastic about software programming and problem-solving and have committed to lifelong learning to develop my technical skills and pursue my career goal of becoming a junior software developer.
